

BackupMyFolder!

Free

PST.FILES PROBLEMS

- You want to control when the backup of your data starts.
- You want to know at anytime the status of the last backup
- You need to backup the full PST files or just a set of folders
- Or just know what has been backed up
- Outlook® standard backup solution is not user-friendly

SOLUTION: BackupMyFolder!

BackupMyFolder! is the first **freeware for Outlook®** that makes backup easy.

With BackupMyFolder! you will :

- **Configure** folders for backup just by right clicking on the folder
- **Schedule** the time of your backup and run even if Outlook® is closed
- **View** at a glance all configured Outlook® folders and the status of the last backup
- **Perform** a differential backup at each run.

DESCRIPTION

BackupMyFolder! Highlights:

- **One tree-view** to check last backup results on all folders
- Select only **folders** or **subfolders** you want to backup just by right clicking
- **Schedule** and **control** the hour of your backup
- Runs with Outlook® 2000, 2003 and **2007**
- Daily message with the result of the last backup

System Requirements

- Outlook 200x/XP®
- Windows 200x®, Windows XP®, Windows Vista®
